Determined that many of the packets to educators and medical personnel can be distributed in interoffice mail. Postage will be needed for the childcare and preschool agencies.

We will send a packet of 5 of each information piece to doctor's offices, 1 packet to Day Cares, Early childhood educators and child care providers.

Work Group did not think custom bags were needed but thought folders are a better way to present the materials. Will look into how much the LGS folders cost.

Sandy Keener, Clinical Coordinator at Community Mental Health Department presented a new system of care that is beginning to be formulated to address needs of 0 to 5 as well as older children. Focus groups have been completed and a Work Plan is hoped to be presented to the steering committee by July

Group met to discuss administrative tasks of this Work Group. No chairperson was determined.
